

PRODUCT INFORMATION

The Artisana[®] multiheight wall systems provide designers, contractors and homeowners ideal solutions for residential and light-commercial retaining and freestanding wall construction where pleasing aesthetics are a key consideration. The attractive multiheight design and rich, variegated colors offer an alternative look to traditional retaining wall units.

The design of these easy-to-use products allows for sweeping curves. The retaining wall system can be used in applications ranging from curves to corners, terraces to raised patios, steps to columns.

The freestanding wall blocks can be used for seating walls, courtyards and patio walls. Complementary caps and column units complete the package.

A versatile product, Artisana units can be used in a combination of 6- and 3-inch-high units, or with 6- or 3-inch-high units alone.

Retaining wall system

- Can be used to build gravity walls up to 3 feet high, including buried course, but excluding the cap.* Taller walls can be built using geosynthetic reinforcement or the Anchorplex™ retaining wall system when designed by a qualified engineer.
- Minimum outside radius, measured on the top course to the front of the units: 4 feet**
- Minimum inside radius, measured on the base course to the front of the units: 8 feet**

Freestanding wall system

- Can be used to build walls up to 3 feet high, including buried course, but excluding the cap
- Minimum radius using all three units: 4 feet**

*This height assumes level backfill and clean, compacted sand or gravel and no surcharge.
**May vary depending on the installation pattern.
