

PRODUCT INFORMATION

Bayfield[®] 6" multipiece retaining wall system

The Bayfield[®] retaining and freestanding wall systems combine earthen tones, rich textures and varied contours, making them a reliable alternative to natural stone walls. Use of Bayfield units creates stunning walls.

Retaining wall system

- Available in three face lengths
- Can be used for gravity walls up to 3 feet 6 inches high, including buried course, but excluding the cap*
- Original rear-lip locator makes installation easy
- Taller walls can be built using geosynthetic reinforcement or the Anchorplex[™] retaining wall system when designed by a qualified engineer
- Minimum outside radius, measured on the top course to the front of the units: 3 feet**
- Minimum inside radius, measured on the base course to the front of the units: 6 feet.**

Freestanding wall system

- Available in three different face lengths for a random look
- Can be used for straight or curved walls
- Used as seating areas, borders and courtyards
- Can be used for walls up to 3 feet high, including buried course, but excluding the cap
- Columns or pilasters constructed with the pillar units can be built up to 6 feet high, including buried course
- Minimum outside radius, measured on the top course to the front of the units: 3 feet, 9 inches*
- Minimum inside radius, measured on the base course to the front of the units: 3 feet, 9 inches*
- Maximum straight-wall length between design elements: 10 feet

**This height assumes cores are filled with drainage aggregate, level backfill and clean, compacted sand or gravel and no surcharge.*

***May vary depending on the installation pattern.*
