

ANCHOR[®]
BUILD SOMETHING BEAUTIFUL

Diamond[®] 10D
RETAINING WALL SYSTEM

PRODUCT INFORMATION

The bold look and easy installation of the Diamond[®] 10D retaining wall system have long made it the obvious choice for residential and light-commercial wall projects. The rough-hewn face lends versatility to this landscaping classic.

The rear-lip locator provides uniform installation and reduces labor costs. The system is completed with a complementary cap unit.

- Build gravity walls up to 3 feet 6 inches high, including buried course, but excluding the cap*
- Taller walls can be built using geosynthetic reinforcement or the Anchorplex[™] retaining wall system when designed by a qualified engineer
- Minimum outside radius, measured on the top course to the front of the units: 2 feet
- Minimum inside radius, measured on the base course to the front of the units: 4 feet

*This height assumes cores are filled with drainage aggregate, level backfill and clean, compacted sand or gravel and no surcharge.

Diamond® 10D

RETAINING WALL SYSTEM

PRODUCT INFORMATION

No pins. No mortar. No misalignments. Rear-lip locator, invented by Anchor, makes installation fast and accurate. Anchor – the original rear-lip product!

Visit anchorwall.com for installation instructions.
