

PRODUCT INFORMATION

The bold look and easy installation of the Hampton Stone[®] retaining wall system makes it the obvious choice for residential and light-commercial wall projects.

The rough-hewn texture of the Hampton Stone product brings warmth and character to any landscaping project. The rear-lip locator makes uniform installation and reduced labor costs possible. Coupled with the optional cap, the versatility of the Hampton Stone system means more design freedom than ever before.

- Build gravity walls up to 3 feet 6 inches high, including buried course, but excluding the cap*
- Taller walls can be built using geosynthetic reinforcement or the Anchorplex[™] retaining wall system when designed by a qualified engineer
- Minimum outside radius, measured on the top course to the front of the units: 2 feet 6 inches
- Minimum inside radius, measured on the base course to the front of the units: 4 feet

**This height assumes level backfill and clean, compacted sand or gravel and no surcharge.*

Hampton Stone[®]

RETAINING WALL SYSTEM

PRODUCT INFORMATION

No pins. No mortar. No misalignments. Rear-lip locator, invented by Anchor, makes installation fast and accurate. Anchor – the original rear-lip product!

Visit anchorwall.com for installation instructions.
